

SUSTAINABLE
BUSINESS INCUBATOR

people + planet + profit

Social Enterprise Catalysts

Mission Statement

The mission of the Sustainable Business Incubator is to develop and support enterprises that contribute to social, economic, and environmental sustainability – living in a manner that does not compromise the needs of future generations.

We discover, build and grow ventures that embrace the three elements of true sustainable success – *People, Planet and Prosperity*.

Our mission includes providing *access to funding, expertise* and a shared *workspace* – both physical and virtual – for *startups, existing businesses* and *nonprofits* with sustainable business initiatives.

We grow both technology and nontechnology companies, including clean energy, water, and sustainable materials companies, and firms focused on “Factor-10” efficiencies and conservation.

SBI serves as a sustainability *advocate* for local communities and promotes the entrepreneurial spirit.
